Profile

Passionate full-stack developer with over 8 years of professional experience delivering robust, scalable solutions across the Microsoft stack and modern front-end frameworks. Known for clean, testable code and a practical, problem-solving mindset. Comfortable building everything from responsive web apps to internal tools that drive real value.

Employment History

Systems Developer, Newtel Limited

November 2024 -

Delivering software and infrastructure solutions across Newtel, Evolvedcoms, and Homenet — covering business connectivity, broadband, and telecom services. My work spans automation, internal tool development, and the deployment of scalable, resilient network services across voice, data, and core infrastructure platforms.

Consultant, C5 Alliance Jersey Ltd

December 2016 - August 2024

Delivered full-stack web and mobile solutions to enterprise clients, with a focus on modern .NET and front-end frameworks. Key contributions:

- Built responsive applications with .NET MVC, Blazor, Umbraco, and React, using Bootstrap and Tailwind CSS.
- Developed native mobile apps with Xamarin and React Native.
- Implemented automated testing with Selenium, Playwright, and Appium.
- Deployed performant, scalable systems in Azure with Varnish-based caching.
- Worked with C#, JavaScript, PHP, SQL, and MySQL to deliver custom solutions

Education

Microsoft

January 2017

- Microsoft Certified Solutions Developer (MCSD) – App Builder
- MCSA: Web Applications
- MCP: Programming in HTML5 with JavaScript and CSS3

Hautlieu School, Jersey

July 2014 - July 2016

- A Levels in Computing, ICT, and Business Studies

Le Rocquier School, Jersey

January 2009 - July 2014

- GCSEs including ICT, Sciences, English, and Design Technology
- BTEC in Business Studies
